Section 7.2 STUDY GUIDE CONTINUED MAIN IDEA: Many genes may interact to produce one trait. Use the chart below to take notes on polygenic traits and epistasis. Many genes may interact to produce one trait. Polygenic Traits Epistasis. MAIN IDEA: The environment interacts with genotype.

~~7.2 Complex Patterns of Inheritance~~

Lesson 16 - Chapter 7.2 - Complex Patterns of Inheritance. Key Concept: Phenotype is affected by many different factors. Learning Objectives: Phenotypes can depend on interactions of alleles. Many genes may interact to produce one trait. The environment interacts with the genotype.

-There are three alleles: A and B are codominant with each other, but dominant over O, which is recessive. -A blood = AA or AO -B blood = BB or BO -AB blood = AB -O blood = OO -A type A blood woman suspects than a man with type AB blood is the father of her child. Her child has type O blood.
