Who's doing it and why. In 2002, the ASHRAE Design Guide for Humidity Control in Commercial and Institutional Buildings recommended dew point control in place of rh control for buildings other than museums. Also, to avoid underestimating the dehumidification load, the Design Guide also recommended that ventilation load calculations be made against the 0.4% outdoor dew point instead of the 0 ...

distribution design. Many places of assembly experience extremely diverse loads and occupancy schedules, complicating part-load system control. But perhaps the biggest challenge is occupancy itself, and its impact on ventilation and humidity control. Design guidelines that are commonly applied in commercial office space may get us into trouble here.
