~~Petroleum Production Engineering | ScienceDirect~~

Petroleum Engineering is concerned with the exploration for and extraction of hydrocarbons, e.g. crude oil and natural gas. Petroleum Engineers use creative and imaginative knowledge of petroleum geology, reservoir behaviour as well as fundamental engineering principles to develop effective and safe solutions for the exploration, recovery and transportation of hydrocarbon products trapped ...

Join us for the 1st AAPG/EAGE Papua New Guinea Petroleum Geoscience Conference & Exhibition is designed primarily for those who explore for petroleum accumulations, appraise them and seek to develop them as producing oil and gas fields. Petroleum Geoscientists of all kinds from: wellsite geologists to exploration program managers; geophysicists to geochemists; and stratigraphers to ...

The transportation sector encompasses all movement of people and goods. Almost 28 percent of U.S. greenhouse gas (GHG) emissions can be attributed to this sector, and the overwhelming share of these emissions are from CO₂ emitted as the result of burning transportation fuels derived from petroleum (EPA, 2009c). Between 1970 and 2007, U.S. transportation energy use and hence GHG emissions ...

For some good general notes on designing spacecraft in general, read Rick Robinson's Rocketpunk Manifesto essay on Spaceship Design 101. Also worth reading are Rick's essays on constructing things in space and the price of a spaceship. For some good general notes on making a fusion powered spacecraft, you might want to read Application of Recommended Design Practices for Conceptual Nuclear ...

Natural gas is one of the world's favorite fuels, but—in its usual piped form—you can't use it just anywhere. You can't pipe gas into a car to power the engine or take it with you when you go hiking in the mountains. Nor can you run a gas pipe out to a boat in the middle of the ocean. And if you live somewhere reasonably rural, you probably can't even have gas at home.

~~Engineering, procurement, and construction—Wikipedia~~

Reservoir engineering is a branch of petroleum engineering that applies scientific principles to the fluid flow through porous medium during the development and production of oil and gas reservoirs so as to obtain a high economic recovery. The working tools of the reservoir engineer are subsurface geology, applied mathematics, and the basic laws of physics and chemistry governing the behavior ...

Engineering, procurement, construction and commissioning (EPCC) contracts are the most common form of contract used to undertake construction works by the private sector on large-scale and complex infrastructure projects. Under an EPCC contract a contractor is obliged to deliver a complete facility to a developer who need only turn a key to start operating the facility, hence EPCC contracts ...
