Biology Homework:
Cell Transport.

Transport is the life processes by which needed materials are brought to the cells of an organism and wastes are carried away from the cells. Transport may be described in two parts.

Bookmark File

2013 Exam Review. 3.

It is estimated that more than 2×10^{26} molecules of ATP are hydrolyzed in the human body daily. If each molecule was used only once you would need approximately 160 kg (350 lbs) of ATP daily.

INTRODUCTION TO
CELLS. All living things
are made from one or
more cells. A cell is the
simplest unit of life and
they are responsible
for keeping an
organism alive and
functioning. This
introduction to cells is
the starting point for
the area of biology that
studies the various
types of cells and how
they work.
