3. Coastal Forests of Eastern Africa. This biodiversity hotspot is located along Africa’s eastern coast on the Indian Ocean. It is a tropical moist forest region that extends from Somalia to Mozambique and includes parts of coastal Tanzania and Kenya. The forests in this region host great biodiversity and have high levels of endemism.

[BIODIVERSITY: BIODIVERSITY-IN AFRICA](#)

Biodiversity is the pillar that allows ecosystems to function and humans to thrive. Without biodiversity in an ecosystem we would not have the many plants and animals we find in our world today, including us. Biodiversity is the “biological diversity in an environment as indicated by numbers of different species of plants and animals.”
