Using the Natural Selection Gizmo, student can explore how color can have an impact on survival. Students hunt for moths on light and dark colored trees, and track light and dark moth populations over a 5-year period.

Gizmo of the Week: Natural Selection Gizmo ...

Observe evolution in a fictional population of bugs. Set the background to any color, and see natural selection taking place. Inheritance of color occurs according to Mendel's laws and probability. Mutations occur at random, and probability of capture by predators is determined by the insect's camouflage. Launch Gizmo.

Student Exploration: Natural Selection

change in the inherited traits of a population of organisms that occurs over many generations. misconception alert:----- refers to changes in populations of organisms over time, but does not imply how these changes have taken place. Natural selection is considered by most biologists to be the primary mechanism of -----.

Natural Selection Gizmo : ExploreLearning

Launch Gizmo. You are a bird hunting moths (both dark and light) that live on trees. As you capture the moths most easily visible against the tree surface, the moth populations change, illustrating the effects of natural selection. Launch Gizmo. HTML5. You are a bird hunting moths (both dark and light) that live on trees.
