The Architect As Developer - University of Tennessee system

If someone wants to be an architect developer, what should they do? For Danny, he knew that he wanted to do it but didn't have any money. The natural action for him was to find someone to partner with. The developer he went to work for was willing to do some smaller projects with their funds and equity.

Architect-developers on the rise - Curbed

On November 5th the RED Club hosted a panel discussion on the topic of the architect-as-developer practice model. The event brought together three leading professionals in the industry to discuss ...

Architect as Developer - Rhetr

The architect-as-developer business model provides an attractive alternative to this traditional method of practice. For the architect, the architect-as-developer practice model presents an opportunity to exert greater project leadership, have more freedom in the design process, have more control over what is built and the quality of its finishes, and, of course, make more money.
