Geocriticism is a method of literary analysis and literary theory that incorporates the study of geographic space. The term designates a number of different critical practices. In France, Bertrand Westphal has elaborated the concept of géocritique in several works. In the United States, Robert Tally has argued for a geocriticism as a critical practice suited to the analysis of what he has ...

Geocriticism - Wikipedia

While private spaces offer different representations of the same coin, the public space only offers a consistent one. Though different, Russell concludes, the two kinds of space seem connected. Working to clarify the connection between a real space and apparent ones, and between real objects and how they appear to us, Russell reviews the fruits of his preceding arguments.
